Passionate JAVA full stack developer with expertise in Java, J2EE, React.js, and HTML,CSS,JavaScript. Skilled in building scalable, high-performance web applications and writing clean, maintainable code. A fast learner with a collaborative mindset, eager to contribute to dynamic projects and deliver seamless full-stack solutions

PROJECTS

- **Personal Portfolio Website**
  Designed and developed an interactive personal website using **HTML, CSS, JavaScript** to showcase skills and projects. Integrated a **contact form** with email notifications and deployed the website on **GitHub Pages**.
- **Student Management System**
  Engineered a console-based application using Java, JSP, Servlet, HTML, CSS, Bootstrap for managing student records (Add, Update, Delete, View).
- **User Authentication**
  Built a user login and registration system using React and Spring Boot. Users can sign up, log in, and access a protected dashboard. After login, the system gives a secure token (JWT) that is used to access protected pages. Spring Security is used to secure the backend, and passwords are safely stored using encryption.
